Visual Language

Design Principles

Sacred Minimalism

Every element serves the spiritual purpose. Remove until only essence remains.

Material Honesty

Show the real metal, real weight, real craftsmanship. No filters, no gloss.

Geometric Harmony

Islamic geometric patterns as subtle texture, never decoration.

Warm Darkness

Dark backgrounds with warm gold accents. Night is when faith deepens.

Layout Rules

Generous whitespace (40%+ of any composition)

Asymmetric balance preferred over rigid symmetry

Product always occupies 50-60% of hero compositions

Text never overlaps product photography

Minimum margins: 5% on all sides for digital, 15mm for print

Texture & Pattern

Subtle Islamic geometric patterns at 3-5% opacity as backgrounds

Brushed metal texture from product renders as section dividers

Grain/noise texture: fine, monochrome, 2-4% opacity for depth

No gradients except radial gold glow behind product hero shots

Iconography

Line icons only. 1.5px stroke. Gold on dark, black on light.

Rounded corners. Consistent 24x24 grid. No filled icons.

Photography

Product Photography

Studio / White BG

Clean white or light gray background. No shadows or minimal. For e-commerce listings and spec pages.

Dark / Moody

Deep black or dark gray background. Single warm light source. Gold reflections. For hero sections and social media.

Lifestyle

Hands in prayer, architectural spaces (mosques, courtyards). Ring as subtle element, never center of attention.

Detail / Macro

Close-up on mosque engraving, metal finish, charging case. Show craftsmanship.

Product grid:	1:1 (square)
